

Gran Boulva — Launch Plan

Gran Boulva is not simply launching an app. It is launching a social environment. The objective is to manufacture momentum, creator identity, emotional engagement, and daily return behavior from day one.

Phase 0 — Pre-Launch Foundation

Recruit 25–50 seed creators, preload 100+ matchups, build WhatsApp/Discord groups, create viral debate content, and establish a waitlist system before launch.

Phase 1 — Soft Launch

Launch with only 200–500 invited users to create high engagement density. Coordinate creators daily and monitor retention obsessively.

Phase 2 — Viral Launch

Push viral sharing through matchup cards, creator rivalries, rankings, predictions, and TikTok/Instagram-ready content.

Phase 3 — Community Expansion

Introduce creator identity systems, support coins, cosmetics, rankings, badges, and seasonal competitions.

Phase 4 — Scale

Expand creator monetization, influencer partnerships, live debates, diaspora growth, and regional expansion.

Growth Strategy

Focus on TikTok clips, WhatsApp sharing, Facebook screenshots, emotionally charged debates, creator battles, and prediction competitions.

Key Metrics

Track Day 1 retention, Day 7 retention, sessions per week, votes per user, arguments per user, and social sharing frequency.

Biggest Risks

Low retention, empty-feeling platform, weak creator activity, poor moderation, and lack of emotional investment.

Long-Term Vision

Become the digital Haitian social arena where influence, opinions, predictions, and creator identity drive online culture.

Timeline	Primary Goal
30–45 Days Before Launch	Seed creators and preload content
Week 1	Soft launch and retention testing
Weeks 2–6	Viral sharing and creator rivalries
Months 2–4	Creator economy and retention systems
Months 4–12	Scale community and monetization
